The Department of Speech, Language, and Hearing Sciences

Mission Statement
The mission of the Department is to contribute to the scientific study of human communication and its disorders, to educate students regarding the relevant knowledge and skills necessary for clinical and research endeavors in the field, and to provide service to the university, community, state, and beyond.

Academic Programs
The Department of Speech, Language, and Hearing Sciences offers coursework leading to the Bachelor of Science (BS), Master of Science (MS), Doctor of Audiology (AuD), and Doctor of Philosophy (PhD) degrees.

The Bachelor of Science degree includes coursework to develop understanding of basic principles of biological sciences, physical sciences, mathematics, and the social and behavioral sciences. The SLHS major provides a broad education regarding human communication and communication disorders across the lifespan. This degree is preparatory for clinical degrees in speech-language pathology or audiology, as well as for advanced degrees in speech, language, and hearing sciences or related fields of study. The degree also provides a foundation in writing, effective communication, and critical thinking to position graduates as attractive for many careers.

The Master of Science degree includes the two-year academic and clinical training to prepare students for a career in speech-language pathology. A nonclinical Master of Science degree is also available.

The Doctor of Audiology (AuD) program is a four-year course of study for a professional degree with a clinical emphasis in audiology.

The Doctor of Philosophy (PhD) program prepares students for academic and research careers through coursework and participation in research projects.

Accreditation
The Master of Science (M.S.) residential education program in Speech-Language Pathology and the Doctor of Audiology (Au.D.) residential education program at the University of Arizona are accredited by Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard, #310, Rockville, Maryland 20850, 800-498-2071 or 301-296-5700.
Department of Speech, Language, and Hearing Sciences
Teaching Mission Statement

The teaching mission of the Department of Speech, Language, and Hearing Sciences at the University of Arizona is to provide excellent foundational and advanced education to students in human communication and its disorders.

- **Undergraduate education**
  - To provide high quality education in speech, language, and hearing sciences
  - To prepare students to succeed in a variety of careers through the application of critical thinking and written and oral communication skills
  - To prepare students to interact respectfully with people with disabilities/disabled people and treat those with communication disorders with empathy

- **Graduate education**
  - To train highly qualified audiologists and speech-language pathologists who are well-grounded in principles of evidence-based practice
  - To instill professionalism in our students, so they demonstrate integrity, compassion, inclusion, excellence, and strong communication skills in their practices
  - To train students to become leaders within their professional communities
  - To prepare the next generation of ethical scientists in our professions

Coursework in the clinical degree programs is designed to support students to achieve the following knowledge outcomes and skills:

- **Ability to demonstrate speech and language skills necessary for effective communication** with clients/patients and their relevant others, and for composing well-written and substantive diagnostic and treatment reports, treatment plans, professional correspondence, and scientific and technical reports.
- **Ability to analyze, synthesize and evaluate biological, acoustic, psychological, developmental, linguistic, and cultural correlates of basic human communication processes and disorders including** speech; receptive and expressive language in oral, written, and manual modalities; hearing; swallowing; and cognitive/social aspects of communication.
- **Ability to analyze and evaluate information about prevention, assessment, and intervention over the range of communication disorders specified in the current ASHA scope of practice for audiology and speech-language pathology.**
- **Ability to analyze and synthesize relevant information regarding professional ethics and to interpret the principles of the ASHA Code of Ethics as they apply to the professional practice of audiology and speech-language pathology.**
• Ability to comprehend the common principles of research and research design, both basic and applied, used in human communication sciences and disorders and to know sources of research information and how to access them.
• Demonstrate an understanding of issues currently having an impact on audiology or speech-language pathology as professions.

Reichenbacher, Richard  Manager, Information Systems
Sasser, Kim  Administrative Assistant, Front Desk
Weber, Doug  Facilities Management Supervisor
FACULTY RESEARCH AREAS

Consistent with our mission to advance the science that provides foundational understanding of human communication and communication disorders, our department houses research laboratories that complement our on-campus clinical facilities. Students have the opportunity to enroll in independent studies, participate in ongoing investigations, and to conduct directed research in the context of thesis and dissertation projects. A wide range of research interests are represented by the faculty as highlighted below.

Mary Alt: Word and concept learning; understanding learning mechanisms; applying learning theory to language treatment. Populations studied include: bilingual children and children with language disorders/delays.

Kate Bunton: Kinematic, aerodynamic, and acoustic characteristics of normal and disordered speech production, speech development, and correlates of speech intelligibility.

Barbara Cone: Human auditory system development and methods for assessing hearing in infants at risk for hearing loss or neurologic impairment.

Huanping Dai: Basic science aspects of auditory perception, applied issues related to hearing, including the application of statistical and psychophysical principles and methods to the diagnoses of hearing disorders, and signal processing for amplification.

Meghan Darling-White: Develop and validate interventions that have an impact on functional speech production skills in individuals with motor speech disorders.

Leah Kapa: Typical and disordered language development in childhood and the interaction between language and cognition in children and adults.

Aneta Kielar: Integration of behavioral and neuroimaging measures of brain function with goal of understanding changes in cognitive functioning associated with brain damage and recovery.

Megan Kobel: Normal and abnormal vestibular function, vestibular diagnostic techniques, motion perception, and aging and cognitive factors in balance, gait, and falls.

Nell Maltman: Language, cognition, and genetics across the lifespan in individuals affected by autism spectrum disorder and fragile X syndrome, and their family members.

Nicole Marrone: Hearing loss and treatment in adults; aging and cognitive factors in auditory perception; improving speech understanding in competing noise and reverberation.

BACHELOR OF SCIENCE PROGRAM OF STUDY

The Bachelor of Science degree in Speech, Language, and Hearing Sciences (SLHS) is conferred through the College of Science. Students complete the general education degree requirements for the College, as well as the requirements for the major. This handbook is intended to provide guidance for students seeking the Bachelor of Science degree in SLHS, or a minor in SLHS. The Department requirements and practices summarized herein supplement those described in the University's General Catalog. For information on general education, major, and minor requirements, the student should consult the University of Arizona catalog at http://catalog.arizona.edu.

The information in this handbook is subject to change as the University or Department guidelines change over time. The handbook is updated annually; students are held to the requirements in effect at the time they declared the degree program unless they formally choose to meet newer requirements. In other words, students use the Cactus book in effect at the time the major is declared but have the option to adopt the guidelines of a newer handbook (in its entirety).

Unit Requirements for the Degree
The minimum required total units for graduation is 120. This includes general education requirements, as well as major (both inside SLHS and outside SLHS). SLHS does not require a minor. At least 42 units must be in upper-division coursework (300-level and above). At least 18 units in the major must be taken in residence. Students are required to have a minimum 2.0 GPA (cumulative and in the major and minor) to graduate.

Advising
Undergraduate advising is provided by Alex Hernandez, Academic Advisor for SLHS and the College of Science (office SLHS building, room 220a). Appointments can be made online at http://student.trellis.arizona.edu/. Students are encouraged to meet with their advisor once per semester to assure that their academic plan is in line with requirements. Progress toward the degree should be tracked using the Academic Advisement Report, and an up-to-date report should be brought to advising sessions. Faculty members are available to answer general questions about the field of study and careers in speech, language, and hearing sciences.

General Education Requirements
All degree-seeking, undergraduate students must satisfy the requirements of the UArizona General Education Curriculum by completing a series of basic college courses. Details of these requirements can be found on the University General Education page https://gened.arizona.edu/.

- Introduction to General Education (UNIV 101)
- Exploring Perspectives (4 courses, 12 units)
- Building Connections (3 courses, 9 units)
- Capstone (UNIV 301)
Major requirements outside SLHS:

- **One Statistics course.** Approved courses: MATH 163, MATH 263, PSY 230, SBS 200, SOC 375.
- **One Math Course.** Approved courses: MATH 113, MATH 113-CC, MATH 115A, MATH 115B, MATH 116, MATH 122B, MATH 125, MATH 125-CC, MATH 129, MATH 129-CC, OR Approved Transfer Course*
- **One Trigonometry Course.** Approved Courses MATH 108 OR Approved Transfer Course
- **One Biological Science course including lab.** Approved courses: ECOL 182L, ECOL 182R, MCB 181L, MCB 181R, MCB 184, PSIO 201, PSIO 202, OR Approved Transfer Course*
- **One Physical Science course including lab.** Approved courses: CHEM 130 & 130L CHEM 141 & CHEM 143, CHEM 151, PHYS 102 & PHYS 181, OR Approved Transfer Course*
- **One Social Science course.** Approved courses: See academic advisement report for a list of courses

**Tracking Progress Toward Academic Requirements**

An Advisement Report is an individualized report of progress toward the completion of degree requirements. Click [here](#) for a sample Advisement Report.

Academic Advisement Reports can be generated using UACCESS Student.

1. Log on to UACCESS Student Center ([https://uaccess.arizona.edu/](https://uaccess.arizona.edu/))
2. Under “Advising” tab select Advisement Report from the drop-down menu and click the arrow to continue
3. Your Academic Advisement Report will process usually within a few minutes. The PDF version contains GPA information.
4. Check the report for accuracy; see your advisor if you have any questions.

**Transfer students:** A recommended curriculum for the BS degree in SLHS and an advisement check sheet for transfer students are provided in Appendices A, B, and C.

Speak to your Academic Advisor for approved transfer courses to ensure direct equivalency. For guidance, see:

- AZ Course Equivalency Guide - [http://aztransmac2.asu.edu/cgi-bin/WebObjects/CEG](http://aztransmac2.asu.edu/cgi-bin/WebObjects/CEG)
The SLHS Major

The undergraduate major in SLHS requires **33 units and a minimum GPA of 2.0**.

- **Required courses** include: SLHS 261, SLHS 267, SLHS 340, SLHS 362, SLHS 367, SLHS 380, SLHS 441, SLHS 473, SLHS 477, and SLHS 483R/L. (See course list in Appendix D for titles and brief descriptions)

- **Elective courses** include: SLHS 207, 255, 263, 270, 435, 454, 455, 458, 459, 471, 495a, 495a, independent study registrations 399 or 499, preceptor registrations 391 or 491, and directed research registrations of 392 and 492. (See Appendix E for titles and brief descriptions)

- Students who ultimately plan to work in Arizona public schools will be required to take Political Science 210 to meet state teacher certification requirements.

The Minor for SLHS Majors

Students select a minor area of study of interest that supports the major. The minor consists of at least **18 units**, nine of which must be upper division (300-level and above). Students are required to have a 2.0 GPA in the minor and take at least 3 units in residence.

*The minor is not required for students in the SLHS Major; however, the minor is strongly encouraged for those wishing to pursue graduate education.*

There are two options for the minor:

1. A traditional minor in one department related to the major, such as Psychology, Linguistics, or Special Education and Rehabilitation, Public Health, and Spanish. You can check the catalog for specific minor requirements for a given department.

2. A thematic minor that includes work in two or more departments that support the major

An example of a thematic minor could be 9 hours of Psychology with additional coursework in such areas as Special Education and Rehabilitation, Educational Psychology, Family Studies, and Counseling and Guidance. These minors are available to students by petition only and the major advisor must approve all thematic minors. Print the Thematic Minor form by from the following location: [http://www.registrar.arizona.edu/academics/thematic-minors](http://www.registrar.arizona.edu/academics/thematic-minors)

There is also a Pre-health thematic minor, which is described on the following website [http://clas.arizona.edu/prehealth/pre-health-minor](http://clas.arizona.edu/prehealth/pre-health-minor).

Coursework for the minor is logged using the Academic Advisement Report, click [here](http://www.registrar.arizona.edu/academics/thematic-minors) for example. Individual student records are kept under the Academic section of UAccess.

Mid-Career Writing Assessment (MCWA)

Every undergraduate degree program requires satisfaction of the Mid-Career Writing Assessment (MCWA). The MCWA is based on student performance in their second semester English composition course. A grade of A or B in one of the following courses will satisfy this University requirement:

- English 102 or
- English 108 (for ESL students) or
• English 104H (for Honors Students) or
• English 109H (for students earning a 4 or 5 on the AP exam)
Transfer courses in composition are evaluated by the English Writing Program coordinators.

Students earning lower than a C grade in the above coursework shall meet the Department requirement by (a) completing one Writing Skills Improvement Workshop of their choice and providing written documentation that this was completed and (b) earning a B or higher in the department writing emphasis course (SLHS 362 Neurobiology of Communication). Please discuss options with the SLHS academic advisor.

Degree Check

Students should initiate a degree check before registering for their last semester. To start the process, schedule an appointment with the SLHS advisor at http://student.trellis.arizona.edu/.

Minor in SLHS (Appendix G)

A minor in SLHS requires a minimum of 18 units, at least 12 of which must involve coursework. University policy requires nine units to be upper division to meet the requirements of a minor.
Additional Educational and Engagement Opportunities

The UArizona 100% Engagement Initiative provides students the opportunity to apply what they are learning in a real world setting and challenges students to learn new skills. Participation in these activities is noted on your official transcript.

SLHS registrations that meet the UArizona 100% engagement initiative include: SLHS 391, 392, 458, 459, 491, and 492.

Independent Studies, Preceptorship, and Directed Research Opportunities
Students have the opportunity of additional engagement through independent study, preceptorship, or directed research opportunities. Such enrollments are arranged individually with the instructor before registering. A list of faculty and their research emphases is included in the Department Overview Cactus book and on the SLHS website. Note that students should be in good academic standing if they want to pursue these additional opportunities.

Learn about Undergraduate Research Experiences:
- [https://ur.arizona.edu/content/undergraduate-research-programs-ua-students](https://ur.arizona.edu/content/undergraduate-research-programs-ua-students)
- [https://grad.arizona.edu/diversityprograms/uroc](https://grad.arizona.edu/diversityprograms/uroc)
- [https://ubrp.arizona.edu/programs/undergraduate-biology-research-program](https://ubrp.arizona.edu/programs/undergraduate-biology-research-program)

SLHS 458/459 Clinical Assistant Program
The audiology and speech-language clinics provide an opportunity for upper class undergraduates to assist in the clinic setting in an independent study activity. Applicants must have at least a 3.2 GPA in the major and follow all clinic guidelines, including HIPAA training. If you are interested, please complete the CAP Student application form.

Clinical Observations
If your goal is to apply to a clinical graduate program, you should obtain 25 clock hours of clinical observation. Graduate programs requires that these hours be completed before beginning clinical practicum in a graduate program.

To observe in the University of Arizona Speech, Language, or Hearing Clinics (including off-campus sites, such as Wings on Words program), students must be registered as degree-seeking students in SLHS or as non-degree seeking graduate students completing prerequisites for the graduate clinical program. Others may observe only with permission of a department clinical faculty member. Each student will have the opportunity to receive, but not to exceed, 25 hours of observation.

See Appendix K for Observation Guidelines and Appendix N for a copy of the Clinical Observation Log. You should retain the original signed observation log, and file a copy with the Department upon graduation with SLHS Student Services Coordinator (Nickole Hayward).
HIPAA Client/Patient Confidentiality Clinical Policy

HIPAA stands for the Health Insurance Portability and Accountability Act, a federal law regarding confidentiality of client/patient information. All students must receive HIPAA training to participate in any clinical endeavor and are expected to adhere to HIPAA and Department policies at all times.

HIPAA training involves two steps:
1. Students must complete the UArizona HIPAA training through UAccess Edge Learning. This training can be completed on campus or from an off-campus location using VPN. On UAccess Edge Learning, in the search bar type HIPAA Annual Certification. Next, click register. When registered click to complete the self-paced modules. Detailed instructions are available on the UAccess EdgeLearning site. When you have completed the module, print the certificate as a pdf. You will be asked to provide proof of training prior to participating in clinical activities.

2. Students must review the department HIPAA policies (available on slhsfac.arizona.edu) and sign the department confidentiality form. Annual updates regarding HIPAA and other security issues will be provided at the start of each academic year.

Students must have a certificate of completion from UAccess Edge Learning and a signed confidentiality form on file. Direct questions regarding HIPAA to Janet Hawley, SLHS HIPAA Compliance Officer.
Student Groups

More information about our student groups visit: https://slhs.arizona.edu/student-groups

**National Student Speech-Language-Hearing Association (NSSLHA)**
Our local chapter of the National Student Speech-Language-Hearing Association's mission is to create meaningful and engaging campus and community experiences for future professionals in the fields of speech-language pathology and audiology. It works to promote advocacy within local and statewide systems to increase awareness of communication difficulties in our communities. NSSLHA meets these objectives through educational, philanthropic, and social activities. Mentoring opportunities, as well as group learning activities, are available throughout the academic year.

**Speech, Language, and Hearing Cats of Color (SHCC)**
SHCC is a student-led organization that aims to provide students interested in careers related to SLHS with academic support and career development resources in order to encourage student engagement and success. SHCC also aims to create solidarity between underrepresented students in the Speech, Language, and Hearing Sciences department, offering social support and representation for the cultural groups within the major as well as fostering a space of security, networking, and connecting these students to one another.

**Student Academy of Audiology**
The Student Academy of Audiology (SAA) is the national student organization of the American Academy of Audiology that serves as a collective voice, and advances the rights, interests, and welfare of students pursuing careers in audiology. SAA introduces students to lifelong involvement in activities that promote and advance the profession of audiology, and provides services, information, education, representation and advocacy for the profession and the public we serve.

**The SLHS Student Success, Innovation, and Community Outreach HUB**
The HUB is dedicated to collaboration centered on student success initiatives, leadership, community partnership, and development. Our purpose is to further student success, innovation, and community outreach initiatives through collaboration and partnership. Our initiatives and programming are grounded in inclusive excellence, supported by the core values of Humility, Understanding, and Belonging. To find out more information on the latest initiatives, please reach out to Dr. Aileen Wong, AuD, CCC-A, slshub@arizona.edu.
https://slhs.arizona.edu/slhs-hub
University Policies and Resources

The University of Arizona seeks to promote a safe environment where students and employees can participate in the educational process without compromising health, safety, or welfare. To that end, the clear policies and guidelines are provided for student and faculty conduct, and excellent resources are available to support all members of the university community. We encourage students to seek guidance and assistance from SLHS faculty and staff as needed, including direct contact with the department head. Anyone who experiences or is aware of discriminatory conduct or threatening behavior is urged to report the concern without delay. Concerns or needs can be communicated directly to the appropriate university offices, including the Dean of Students, Human Resources, and the Office of Institutional Equity.

Nondiscrimination and Anti-harassment Policy: The University is committed to creating and maintaining an environment free of discrimination; see http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy

Threatening Behavior Policy: The UArizona Threatening Behavior by Students Policy prohibits threats of physical harm to any member of the University community, including to oneself. See http://policy.arizona.edu/education-and-student-affairs/threatening-behavior-students.

UA Office of Institutional Equity: https://equity.arizona.edu/

Code of Academic Integrity: All members of the University of Arizona community have a responsibility to uphold and maintain an honest academic environment by following the UArizona Code of Academic Integrity. Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work/exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UArizona Code of Academic Integrity as described in the UArizona General Catalog. See http://deanofstudents.arizona.edu/academic-integrity/students/academic-integrity.

Support Services and Resources for Students

Support Services: Student Assistance serves as a central support resource for all students. Help is available to support students and their families manage crises, life traumas, and other barriers that impede success. The staff works to address the needs of students who struggle in such areas as psychological health, physical health, victimization, relationship issues, social adjustment, and academics through a variety of interventions, referrals, and follow up services. We strive for a culture of caring on campus. Resources are available here: https://deanofstudents.arizona.edu/support/campus-resources

Disability Resources Center: The Disability Resource Center (DRC) leads the University in a progressive and proactive approach to campus accessibility. Our goal is to ensure that disabled students, employees and visitors, have a similar, if not identical, experience to that of their non-disabled counterparts. In addition to facilitating individual accommodations, DRC works proactively to impact the systemic design of our campus environments to be seamlessly accessible, reducing or eliminating the need for any individual accommodations or modifications. https://drc.arizona.edu/about
Graduate School Application Process

States require a graduate degree (M.S. or Au.D.) to practice in speech-language pathology or audiology, respectively. Near the end of your junior year, you should begin thinking about where you might want to attend graduate school, if you plan to practice as a clinician. Below are some considerations and resources to help you in the process of applying to graduate schools:

- You will want to research the different programs, their requirements, application, and deadline information. A listing of programs accredited by the American Speech-Language-Hearing Association can be found on the ASHA website at: https://caa.asha.org/programs/
- ASHA provides a website called “EdFind” that allows users to apply custom search filters for academic program, such as location https://find.asha.org/ed/#sort=relevancy
- You should apply to several graduate programs to ensure your chances of being accepted into at least one; the admissions process is competitive.
- During the summer or fall of your senior year, you will want to take the GRE if you are applying to schools that require it. It is a good idea to take the exam early enough so that you will have time to take it again if necessary.
- Consider which faculty members you would like to approach to write letters of recommendation for you. When you request a letter, be sure to provide information about the schools you are applying to and deadlines, your academic experience (including unofficial transcript), your personal statement, and whatever else the faculty member may request.
- Be sure to keep the original Observation Hours form(s). You will need to provide proof of observation hours to your graduate program. An electronic (scanned) copy of Observation Hours should be on file in the department (SLHS Student Services Coordinator Nickole Hayward) as they may be asked to verify the requirement is complete.
- Note that some of your undergraduate coursework serves to meet the knowledge and skill requirements of the American Speech-Language-Hearing Association Standards. The standards are posted on the ASHA website and are updated every few years.
  - For speech-language pathology, see https://www.asha.org/Certification/2020-SLP-Certification-Standards/
  - For audiology, see https://www.asha.org/Certification/2020-Audiology-Certification-Standards/

Appendix F is a guide regarding what SLHS coursework at UArizona is associated with ASHA standards.

<td>3</td>
</tr>
<tr>
<td>Minor/Elective/Ge/Research/Independent Study/ Preceptorship 1-3</td>
<td>1</td>
</tr>
</tbody>
</table>

**Total Units: 12-16**

### AVAILABLE ELECTIVES:

**SLHS 207: Survey of Communication and Its Disorders** – Students are introduced to the scientific study of human communication and its disorders, with an overview of the biological systems of speech, language, and hearing, and a basic understanding of the nature and treatment of communication disorders across the lifespan.

**SLHS 255: Hearing, Health, and Society** – This course introduces students to critical thinking in relation to quality of life associated with hearing loss across the lifespan.

**SLHS 263: World of Sound** – An introduction to sound – its production, perception, and use in speech, music, and animal communications. The course is divided into basics of sound; music and speech production; the hearing system; and speech perception.

**SLHS 270: Scientific Thinking in Speech and Hearing Sciences** – The purpose of this course is to introduce the student to scientific reasoning and critical thinking skills in the speech and hearing sciences. The main goals are to teach basic skills for critically evaluating research and implementing an experiment.

**SLHS 435: Bilingualism, Multiculturalism, and Nonmainstream Dialects** – This course provides students with an overall understanding of child socialization practices, typical language development, and communication disorders across cultural-linguistic groups and issues related to the assessment of and intervention with individuals from culturally and linguistically diverse populations.

**SLHS 454: Audiologic Rehabilitation Across the Lifespan** – This course provides an introduction to interventions aimed at minimizing the communication difficulties associated with hearing loss in people of all ages. **Recommended for those pursuing graduate studies.**

**SLHS 471: Speech Sound Disorders** – The purpose of this course is to introduce students to the major constructs currently framing the study of speech sound disorders as well as cover topics on assessment and treatment of these disorders. This course is highly recommended for students interested in pursuing an SLPA (Speech-Language Pathology Assistant) certificate or graduate study. **Recommended for those pursuing graduate studies.**

**SLHS 497: Mapping Your Future: Planning for Your Career** – This workshop-style course introduces undergraduates in SLHS to career paths within communication disorders, as well as other disciplines. The focus of this course is to prepare students for applying to graduate school, as well as the development of alternative career paths in order to remain adaptable after graduation.
APPENDIX C

Suggested Course Sequence for TRANSFER STUDENT
in Speech, Language, and Hearing Sciences

Transfer students should meet with their major advisor on a semester-by-semester basis. A maximum of 64 units of community college course work may apply toward degree requirements. Coursework completed at community colleges are considered lower division. Students must complete 42 units or more of upper division coursework (300 and above) in order to graduate. Also, a minimum of 18 of the final 30 units taken toward degree requirements must be UA Arizona University credit.

The course sequence below includes elective minor and upper division coursework.

<table>
<thead>
<tr>
<th>JUNIOR YEAR FALL SEMESTER</th>
<th>JUNIOR YEAR SPRING SEMESTER</th>

<td>Minor/Upper Division 6-12</td>
</tr>
<tr>
<td>SLHS 471 Speech Sound Disorders+ 3</td>
<td>SLHS 454 Auditory Rehab+ 3</td>
</tr>
</tbody>
</table>

*These courses are frequently offered during summer session, see your academic advisor for updated summer offerings
+ recommended for those planning to pursue graduate training for both SLP and AuD

Be advised that transfer students are required to meet with their major advisor (SLHS advisor) to build an individualized plan of study based on transfer coursework.

Timeline for completion of degree requirements will also depend on transfer coursework with special attention to math and science proficiency and course history.
APPENDIX D

Required SLHS courses

Syllabi for all courses can be found at https://slhsfac.arizona.edu/content/current-slhs-course-syllabi

261 Anatomy of the Speech Mechanism (lecture + discussion)
This course is focused on the basic anatomy and physiology of the respiratory, laryngeal, and supraglottal airway subsystems as they pertain to speech production for human communication.

267 Acoustics for the Speech and Hearing Sciences
Basic principles of acoustics in speech and hearing are covered in this course.
Prerequisite: Math 108

340 Language Science
Core features of language are identified and integrated into a model of language that is applicable to language disorders and language development. Topics include: phonology, morphology, syntax, semantics, and pragmatics.

362 Neurobiology of Communication
This course focuses on the role of the central nervous system in human communication. The study of brain anatomy and physiology is approached from the perspective of how neurological systems support speech, language, and hearing and how breakdowns in these systems disrupt aspects of communication.
Writing Emphasis Course.

367 Phonetics for Clinical Practice
This course overviews the scientific study of speech sounds with a focus on transcription of different types of speech, including adult and child speech, and typical and disordered speech. The focus of the class will be primarily on English (including its dialectal variants), but other languages will also be discussed.

380 Hearing Science (lecture + discussion)
This course introduces the scientific foundation for the sense of hearing and is organized around lectures and laboratory demonstrations that address (a) the anatomy and physiology of the ear and related structures, and (b) the basics about auditory perception.
Prerequisite: SLHS 267.

441 Language Acquisition
Principles and processes of first language acquisition described in relation to children's social and cognitive development; first language acquisition processes compared and contrasted to child and adult second language acquisition and language disorders.
Prerequisite: SLHS 340.

473 Communication Disorders II
This course focuses on disorders affecting communication across the lifespan. Consideration is given to signs and symptoms, etiology, adult and child course, and vocational-social impact of these disorders.
Principles of assessment and intervention are highlighted.
Prerequisite: SLHS 477.

477 Communication Disorders I
This course focuses on disorders affecting communication across the lifespan. Consideration is given to signs and symptoms, etiology, clinical course, and vocational-social impact of these disorders.
Principles of assessment and intervention are highlighted.
Prerequisite: SLHS 261

483R/L Principles of Audiology (lecture + lab)
Basic principles and techniques of audiological testing, etiologies of hearing impairment, and intervention strategies are taught in this course. The laboratory provides hands-on experience in support of the content taught in the lecture. Concurrent enrollment is required.
Prerequisites: SLHS 267 and 380.
APPENDIX E

Elective Courses Available in SLHS

Syllabi for these courses can be found at https://slhsfac.arizona.edu/content/current-slhs-course-syllabi

**207 Human Communication and Its Disorders**
The purpose of this course is to introduce students to the scientific study of human communication and its disorders, and to introduce the professions of Speech-Language Pathology and Audiology.

**255 Hearing, Health, and Society**
The purpose of this course is to introduce students to critical thinking in relation to communication disorders and quality of life issues associated with hearing loss and aging.

**263 The World of Sound: Speech, Music, & MP3s**
This class is an introduction into all these aspects of sounds and our perception of them.

**270 Scientific Thinking in Speech and Hearing**
This course is about scientific thinking and an appreciation of the achievements and constraints of science.

**435 Bilingual, Multiculturalism, & Nonmainstream Dialects**
This course provides students with an overall understanding of child socialization practices, typical language development, and communication disorders across cultural-linguistic groups and issues related to the assessment of and intervention with individuals from culturally and linguistically diverse populations.

**454 Auditory Rehabilitation across the Lifespan**
This course introduces interventions aimed at minimizing the communication difficulties associated with hearing loss in people of all ages.

**458/459 Clinical Assistant Program**
Opportunity to work with a clinical educator and graduate students in the clinic setting.

**471 Speech Sound Disorders**
The purpose of this course is to introduce students to the major constructs currently framing the study of speech sound disorders as well as cover topics on assessment and treatment of these disorders. This course is highly recommended for students interested in pursuing an SLPA (speech-language pathology assistant) certificate or graduate study.

**495A Colloquium**
The purpose of the colloquium series is to provide a forum for SLHS faculty and students, as well as for others in the community, to be exposed to new research and discussion of topics that are of importance to our field.

SLHS 454    Audiologic Rehabilitation-Lifespan
SLHS 471    Speech Sound Disorders
SLHS 473    Communication Disorders II
SLHS 477    Communication Disorders I
SLHS 483R/L Principles of Audiology (4)
APPENDIX G

Overview of the MINOR in Speech, Language, and Hearing Sciences

Students wishing to complete a Minor in SLHS are advised of the following:

1. A minor in SLHS requires a minimum of 18 units, at least 12 of which must involve coursework. University policy requires 9 units to be upper division to meet the requirements of a minor. See Table 1 below for available courses. For students who intend to pursue graduate school in Speech-Language Pathology or Audiology, a recommended course sequence is provided below (Tables 2 and 3).

2. At least 12 units of the SLHS Minor must be taken at the University of Arizona.

3. A minimum GPA of 2.00 is required in the SLHS Minor.

4. Some courses may have prerequisites. Students are strongly encouraged to meet with the SLHS advisor and plan ahead to facilitate completing the course sequences in a timely manner.

5. For students interested in pursuing graduate studies in Speech-Language Pathology or Audiology: Completing a Minor in SLHS does NOT guarantee that all prerequisites for graduate school have been met. Although SLHS Minor students are strongly encouraged to take courses that will satisfy prerequisites for graduate school, there may be situations in which this is not possible (for example, see point 6 below). Coursework for Graduate Study in Speech-Language Pathology (https://slhs.arizona.edu/SLP-prerequisites) and/or the Recommended Coursework for Graduate Study in Audiology (https://slhs.arizona.edu/students/doctor-audiology-aud) to formulate an optimal plan with the SLHS advisor.

6. Students who are pursuing a Major in SLHS receive priority over SLHS Minor students in class registration. This means that in some cases, SLHS Minor students may not be able to take a course (including required or prerequisite courses) because of limited enrollment capacity.
APPENDIX H
Available Courses for the Minor in SLHS

All courses are 3 units and have prefix SLHS unless otherwise noted. P = course with prerequisites. See catalog for course titles and descriptions.

APPENDIX L

Clinical Observation at the University of Arizona SLHS Clinics

Undergraduate students enrolled in SLHS can observe up to 25 hours of clinical activities in the UArizona Speech-Language and Hearing Clinics. To assure that patient/client confidentiality, students must complete HIPAA training before observations can be scheduled.

Clinic Locations
• Audiology Clinics: 1st Floor of SLHS
• Speech-Language Pathology Clinics
  o 1st floor - Grunewald Blitz Clinic for Children
  o 4th Floor - Clinic for Adult Communication Disorders
  o Child Language Center: 202 E Speedway Blvd, Tucson, AZ 85705

Signing up to Observe
After the semester is underway, observation procedures and sign up will be available on: https://slhs.arizona.edu/clinical-observations

Clinic Dress and Demeanor:
https://slhs.arizona.edu/sites/default/files/2022-10/Clinic%20Dress%20Code%20May%202022%201p.pdf
APPENDIX M

Overview of Confidentiality Guidelines

From HIPAA Privacy and Security Policies and Procedures
Confidentiality of client/patient information is mandated by federal law and is the practice of the Department of Speech, Language, and Hearing Sciences (SLHS). The Health Insurance Portability and Accountability Act (HIPAA) of 1996 and the Health Information Technology for Economic and Clinical Health (HITECH) Act of 2010 created national standards regarding the privacy and security of health care information. The University of Arizona and the Department of Speech, Language, and Hearing Sciences have procedures in place to protect the confidentiality, integrity and availability of protected health information (PHI). All SLHS faculty, staff, affiliates, volunteers and students must comply with SLHS policies and procedures regarding the privacy and security of PHI.

HIPAA Training Policy
All students majoring in SLHS, students involved in activities that bring them in contact with patients/clients in the clinic, and all faculty and staff must complete HIPAA training with annual updates, as needed.
- Undergraduate students who, as a part of their undergraduate programs, observe patients/clients in the clinic or who are involved in other activities which bring them into the clinic, are required to complete HIPAA training prior to participating in the observation or activity.
- Prior to observation in the clinic, students are required to provide evidence of completion of HIPAA training.

Medical Records Policy
Only students and faculty assigned to a clinical case shall access that client/patient’s personal health information (PHI).
- Undergraduate students completing observations are not allowed to view client/patient files (hard copy or electronic).
- Exceptions can be approved by a supervising faculty member when a student is involved in a research or educational project that requires clinical information. In such cases the student’s name and faculty name must be logged in the client/patient file. Students involved in the Clinical Assistant Program may be granted access to records specifically relevant to their clinical activities.
- Students ARE permitted to review therapy lesson plans when observing in the Speech-Language Clinic. The lesson plans are typically available in the observation room and are labeled with only client/patient initials.

Confidentiality
- Students should not discuss information regarding clients/patients that are observed in the clinic. The exception to this rule relates to educational discussions with SLHS faculty. Such discussions should only be conducted in private areas. On occasions where it is appropriate to discuss observations in class (as indicated by your instructor), the identity of the individuals should always be protected.
- It is allowable for some protected health information to be shared for educational purposes, such as case presentations in class that may include photographs, video/audio recordings, and written information/data ONLY IF the client/patient provides written consent to Use Clinical Information for Educational Purposes form. Students are expected to maintain the confidentiality of such information presented in the classroom.

Breach of Client/Patient Confidentiality Policy by Undergraduate Students
Undergraduate students who fail to abide by these guidelines will be subjected to corrective action (see Appendix). A breach is the unauthorized disclosure of any form of PHI. If an actual or potential breach occurs, the individual discovering the breach must report it immediately to the Course instructor (if it occurred relative to information shared in a class), the SLHS Privacy Officer (Janet Hawley). These individuals will coordinate a response to the breach in accordance with procedures established by the Office for the Responsible Conduct of Research and the University of Arizona Information Technology Systems Department.
APPENDIX N

Corrective Action for Breach of Client/Patient Confidentiality Clinical Policy by Undergraduate Students

**Purpose:** This policy sets forth guidelines for corrective action when undergraduate students fail to comply with the confidentiality policy of the University of Arizona Department of Speech, Language, and Hearing Sciences and associated clinics both on and off campus.

**Policy:** Corrective action will be taken to correct inappropriate behaviors that could compromise the confidentiality of client/patient information. A breach is defined as the unlawful or inappropriate acquisition, access, use, or disclosure of protected health information (PHI) in a manner not permitted which compromises the security or privacy of PHI. The Course Instructor, Privacy Officer, and Clinical Instructors are responsible for addressing these behaviors in a timely manner and for documenting corrective actions.

It is the responsibility of the Privacy Officer (via HIPAA training), the Course Instructor and, as applicable, the Clinical Faculty to inform students of:

- the federal law governing confidentiality of clinical information
- departmental rules for protecting confidentiality of client/patient information
- the steps that will be taken to correct violations of the rules for protecting confidentiality of clinical information
- the timeline for correcting inappropriate behavior(s)
- the consequences of failure to abide by departmental rules for protecting confidentiality of client/patient information

Any academic or clinical faculty member or member of the staff who observes a student, or group of students, engaged in a behavior that appears to threaten or breach the confidentiality of client/patient information is required to immediately advise the student of their concern and file an incident report with the Course Instructor or Privacy Officer.

**Corrective Action Steps**

**Step 1: Conference with Course Instructor/Privacy Officer:** Depending on where the confidential clinical information was presented/observed (i.e., in class vs. in the clinic), the Course Instructor (or Privacy Officer) is required to confer with the student or students named in the incident report. The goal of the conference is to ensure that there is both understanding of and commitment to protecting confidentiality of client/patient information.

**Step 2: Written warning and conference:** When a student has been named in a second incident that could potentially breach confidentiality, s/he will be given a written warning from the Course Instructor, or Privacy Officer, as appropriate. The reason for the written warning will be discussed with the student. Thereafter the written warning will be placed in the student's record in the department. The goal of the conference is to explain the seriousness of maintaining confidentiality of client/patient information and the consequences of another instance of inappropriate behavior that can include a grade of failure in the associated class.

**Step 3: Suspension from class participation and a grade of failure:** Students who have received a written warning and thereafter are judged to have behaved in such a way as to breach the confidentiality of client/patient information will be suspended from class participation and receive a grade of failure.

Students have the right of appeal of actions and decisions of suspension from class and receipt of a failing grade. The appeal must be filed with the department head within 5 days of receiving the decision. For appeal procedures see UArizona Student Disciplinary Procedures found at the following website https://deanofstudents.arizona.edu/student-rights-responsibilities/student-rights-responsibilities
