

Child Language Treatment Study

Improving Children's Understanding of Complex Sentences

We will provide a free program to improve language skills to children who have difficulty listening, speaking, reading, or writing, but have no medical, developmental, intellectual, or neurological disorders.

Open to children 8 through 11 years old.

You Get:

Parents: Free language assessment and intervention for your child

Kids: up to \$240 worth of gift cards for completing the intervention.

Where?

Online

OR

The University of
Arizona Department of
Speech, Language, &
Hearing Sciences
